## Locate your Advanced Tools and Applications

Once you log into your Online Presence Portal you will find your name in the upper right corner of the blue task bar. When you place your mouse on the blue down arrow, a menu will open; select the Advanced Tools to open a new window with the list of all Advanced Tools that are available with your specific plan. You can also use the Quick Access menu to find Advanced Tools.

When the new window opens, you can choose from various Apps/Tools by choosing to view ALL or a specific category. Tiles for the tools are color coded based on their category. Note that only available tools based on product plan and purchases will be shown.

WordPress Installer is found in the Web Tools category.

## Introduction

WordPress is an easy-to-use weblog system, providing numerous features like categories, ratings, as well as plugins installation. This installer application will easily install the WordPress tool to a directory that you specify within your web services account.

When you launch the WordPress Installer icon, the following screen will display:

## Navigation

There are two ways to navigate within WordPress Installer. You may navigate using the Main Menu or the Alternative Menu.

### Main Menu

The main menu is located on the top right corner of WordPress Installer:

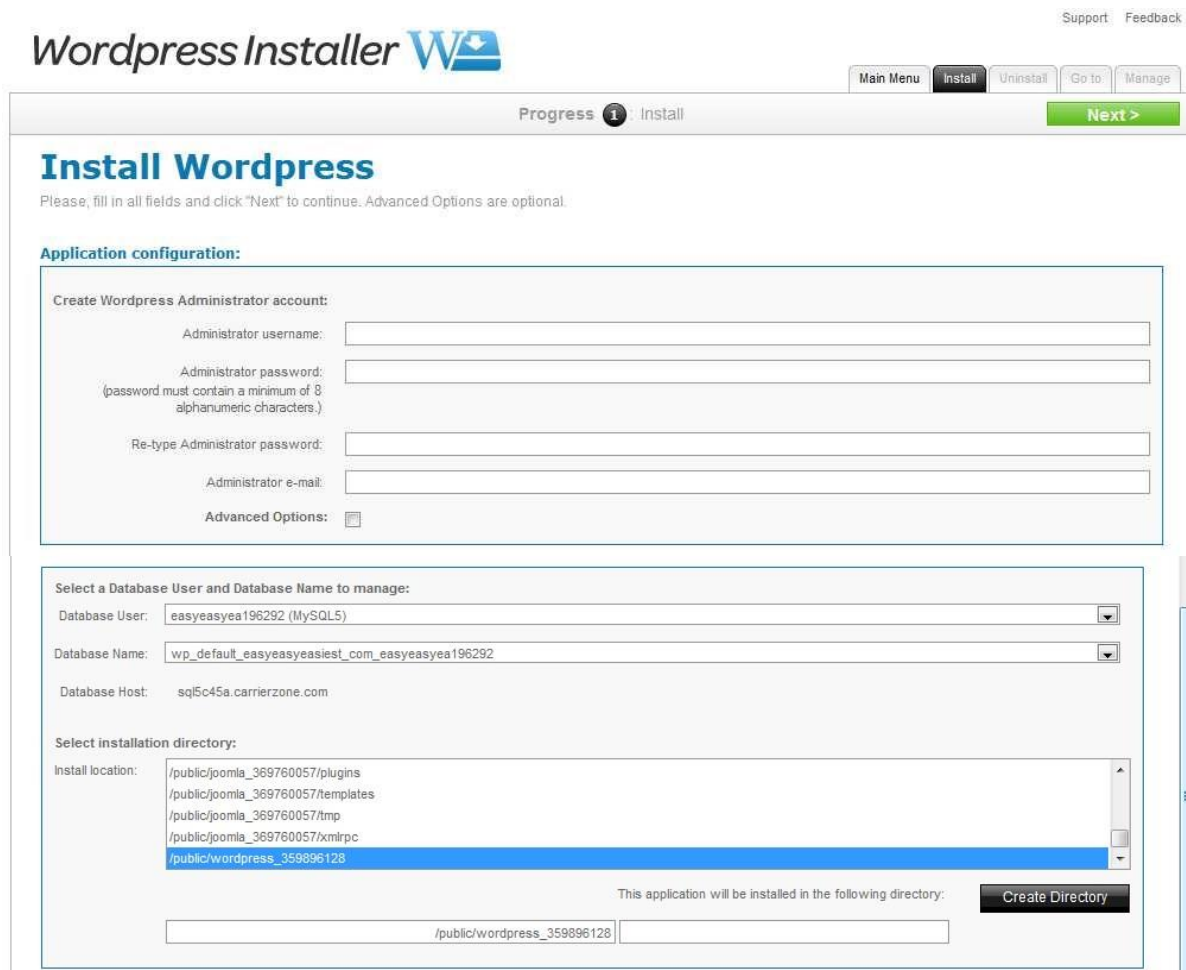

- Main Menu: links you to the Main Page of WordPress Installer
- Install: links you to the page where you can start installing this application
- Uninstall: links you to the page where you can uninstall this application
- Go To: links you to the page where you can access this application and start using it after installing it.
- Manage: links you to the page where you can manage this application
- Support: opens online help files for WordPress Installer in a new window
- Feedback: allows you to send feedback concerning WordPress Installer

## Alternative Navigation

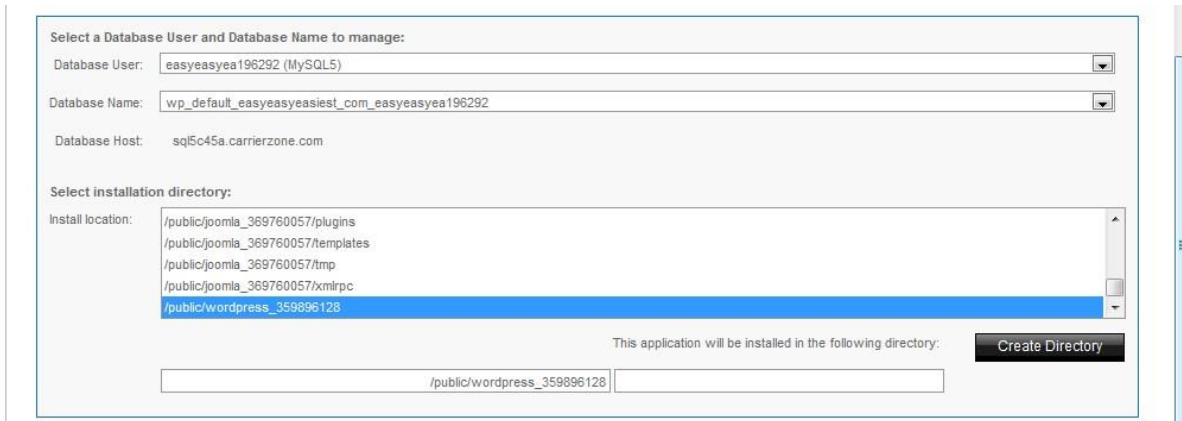

Within some sections you will find Go Back and Next buttons – these allow you to go back and forth between pages.

## Install

1. Click on the “Install” tab on the navigation bar. The following page will be displayed:

2. Enter Administrator account details (create a username and password). You will need this information in order to access your Wordpress account.
3. Enter an email address (this can be any email address)
4. If you are an advanced user please check off the “Advanced Options” checkbox. The screen will display capabilities for you to select a Database User and Database Name to manage.

5. Select a Database User and Database Name to manage.
6. Select installation directory or create a new directory.
7. Click “Next” to complete the installation. The following page will be displayed:
  - a. Click “Cancel” to dismiss the changes

Note: Your administrator username has to be longer than 3 characters and your password must be longer than 5 characters.

## Uninstall

In order to uninstall WordPress, click on the “Uninstall” tab within the main navigation menu. The following page will be displayed:

## Wordpress Installer
